

Favour Funmilola Adebisi

Frontend Developer

funmilolaadebiyi52@gmail.com | [Portfolio](#) | [LinkedIn](#) | +2347063099020 | Lagos, Nigeria

SUMMARY

Results-driven Frontend Developer with a solid foundation in building interactive and responsive web applications. Skilled in HTML, CSS, JavaScript, Vue.js, React, Next.js, and Typescript with a strong eye for UI/UX design and optimisation. Experienced in developing clean and efficient code. Passionate about delivering high-quality user experiences and continuously improving through hands-on projects and self-directed learning.

SKILLS

- HTML, CSS, JavaScript, Vue.js, React, Next.js, Typescript.
- Responsive Design
- Debugging and Troubleshooting
- Knowledge of UI/UX design principles
- Strong problem-solving and analytical abilities
- Excellent teamwork and collaboration skills
- Understanding of browser developer tools

PROFESSIONAL EXPERIENCE

YouVerify

August 2025 – Present

Frontend Developer (NYSC)

Lagos, Nigeria

- Own Worked on building and maintaining web applications using React, Next.js, and TypeScript.
- Developed responsive and user-friendly interfaces while integrating APIs and handling data from backend services.
- Improved application performance by organizing code into reusable components and following best practices.
- Participated in team activities such as code reviews, task planning, and version control using GitHub.
- Assisted with integrating third-party services to improve application features and functionality.

YouVerify

August 2023 – December 2023

Frontend Developer Intern

Lagos, Nigeria

- Completed a verified six-month industrial training focused on applying and improving front-end development skills through personal projects.
- Gained hands-on experience in UI/UX design, mobile responsiveness, and JavaScript framework integration.
- Practised agile development and version control using GitHub and Visual Studio Code .

PROJECTS

AI Workflow Creation Platform

Focus: Workflow Automation, API Integration, State Management, Interactive UI

- Developed a drag-and-drop workflow builder using React Flow, enabling users to visually design compliance and KYC workflows with configurable workflow nodes.
- Integrated backend APIs to create, save, load, and execute workflows, including support for AI-generated workflows and execution monitoring.
- Implemented global state management with Zustand to synchronize workflow data, node configurations, execution results, and canvas state across the application.
- Built dynamic configuration panels for multiple workflow nodes, including ID verification, data transformation, conditional logic, manual review, delay, and notification nodes.
- Designed an execution inspector that displays node-by-node execution status, request and response payloads, execution duration, and logs to simplify workflow debugging.
- Implemented workflow validation to ensure required nodes, valid configurations, and proper node connections before allowing workflows to be saved or executed.
- Developed responsive, component-based interfaces using Next.js, TypeScript, Tailwind CSS, and shadcn/ui, providing an intuitive user experience across desktop and mobile devices.

GitHub Profile Explorer

Focus: API Integration, State Management, Data Fetching

- Integrated the GitHub API using Octokit to retrieve user profile data, repositories, and activity.
- Utilized Redux Toolkit (RTK Query/async thunks) to handle API calls, manage asynchronous data fetching, and maintain global application state.
- Developed a search functionality allowing users to query GitHub profiles and view detailed insights, including top repositories and most-starred projects.
- Implemented interactive navigation with direct links to users' GitHub profiles and repositories for seamless external access.
- Designed a responsive, component-based UI to present data and enhance user experience efficiently.

Get Expert Platform

Focus: Authentication, Form Handling, UI Architecture

- Implemented secure user authentication using Firebase, enabling account registration, login, and session management.
- Developed and validated dynamic forms with React Hook Form, improving data accuracy and reducing form submission errors.
- Designed and built a responsive, component-based UI with structured sidebar navigation for seamless user interaction across multiple sections.
- Enhanced user experience through intuitive layout design and efficient state management for smooth navigation and interaction.

TOOLS

- Visual Studio Code, Figma, GitHub, Google Suite, and Microsoft Teams

EDUCATION

Adekunle Ajasin University, Ondo State, Nigeria

BSc in Computer Science, Ondo, Nigeria
